

“Top 5 Markets” is Two Different Questions

ATLIQ HARDWARE GDB0041

MYSQL | Vishnu Ram Sachin | Data Analyst

Problem Statement

DAY 5 / 15

31/07/26

- Table: fact_sales_monthly, dim_customer, fact_grpss_price
 - Report Needed - Top 5 Markets by Gross Sales FY 2021
 - Your manager wants **the list**.
-

Requirment

Row Count = 5

RANK <= 5

Both Valid , until a Tie shows up

The Fix No: 1

DAY 5 / 15

31/07/26

```
RANK() OVER (ORDER BY SUM(  
fsm.sold_quantity * fgp.gross_price)  
DESC) AS rnk
```

The Fix No: 2

```
ORDER BY gsr.gross_sales_mln DESC  
LIMIT 5
```

A Quick Analogy

Running Race Finish

LIMIT 5

x 5

RANK() <=5

x 6
if Tie at 5

Two runners cross at the exact same time for 5th, Extra medal will handled - Totally six medals for Top 5

LIMIT $\neq$ RANK

LIMIT 5;
```

Result No.2

The screenshot shows a SQL IDE window with a query editor and a result grid. The query is a CTE (Common Table Expression) named 'gross_sales_report' that selects fiscal_year, gross_sales_mln, and market from fact_sales_monthly, dim_customer, and fact_gross_price tables. The results are ordered by gross_sales_mln in descending order and limited to 5 rows.

```

25 • WITH gross_sales_report AS (SELECT
26     fsm.fiscal_year,
27     ROUND(SUM(fsm.sold_quantity * fgp.gross_price)/1000000,2) gross_sales_mln,
28     dc.market
29 FROM gdb0041.fact_sales_monthly fsm
30 JOIN dim_customer dc
31     ON dc.customer_code = fsm.customer_code
32 JOIN fact_gross_price fgp
33     ON fgp.product_code = fsm.product_code
34     AND fgp.fiscal_year = fsm.fiscal_year
35 WHERE fsm.fiscal_year = 2021
36 GROUP BY dc.market)
37
38 SELECT gsr.fiscal_year, gsr.market,
39     gsr.gross_sales_mln
40 FROM gross_sales_report gsr
