

I FILTERED BY
YEAR(date) = 2021
GOT WRONG
FISCAL YEAR

ATLIQ HARDWARE GDB0041

MYSQL | Vishnu Ram Sachin | Data Analyst

Problem

Statement

DAY 2 / 15

28/07/26

- Table: fact_sales_monthly
(date,fiscal_year,product_code,customer_code,sold_quantity)
- Your manager asks: “give me FY2021 sales”.

The Trap ❌

- WHERE YEAR(date) = 2021 runs clean but AtliQ’s fiscal year begins at September , Not January

Jan - Aug 2021

Sep - Dec 2021

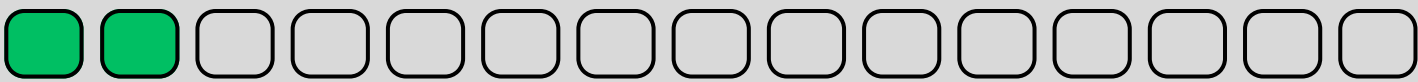

Results

FY2021

+

FY2022

Requirment

DAY 2 / 15

28/07/26

SEP 2020

AUG 2021

Everything in this range is one fiscal year - FY2021

The Fix

```
WHERE YEAR (
DATE_ADD(date, INTERVAL 4 MONTH )
) = 2021
```

Bonus Find

DAY 2 / 15
28/07/26

One column I didn't need to compute - fiscal_year

Date | Fiscal Year | Product_Code | Customer_Code | Sold_quantity

Customer_Name ----- Already in this table

YEAR(date) ----- Needs manual math

A Quick Analogy

Indian Income Tax

April 2020 - March 2021

FY 2020 - 21

Likewise AtliQ fiscal year begins at September

Same Concept , Different Month

Fiscal Year = Business Calender

Same Idea in MySQL

DAY 2 / 15

28/07/26

September

+ 4 month

January

Date_Add(date, INTERVAL 4 MONTH)

August

+ 4 month

December

SELECT

date,

fiscal_year,

product_code,

customer_code,

sold_quantity

FROM gdb0041.fact_sales_monthly

WHERE YEAR(

DATE_ADD(date, **INTERVAL 4 MONTH**)

) = 2021 ;

Results

DAY 2 / 15

28/07/26

fact_sales_monthly

SQL File 6*

Don't Limit

```

8
9
10 --- FIX QUERY TO GET FY2021 SALES
11
12 • SELECT *
13 FROM gdb0041.fact_sales_monthly
14 WHERE YEAR(DATE_ADD(date, INTERVAL 4 MONTH)) = 2021;
15

```
