

I Ranked Markets by Gross Sales Lost the Grand Total Doing It

ATLIQ HARDWARE GDB0041

MYSQL | Vishnu Ram Sachin | Data Analyst

Problem Statement

DAY 6 / 15

01/08/26

- Yesterday : Ranked markets by gross sales
- Tables : dim_customer(market), fact_sales_monthly, fact_gross_price
- Your manager wants % of Market share of FY2021

The Trap ❌

- USING only GROUP BY Market gives each market its own total but grand total disappears

Grand total Gone

Wrong Calculation

Returns 1 Row

Requirment

DAY 6 / 15

01/08/26

GROUP BY market

OVER ()

Both columns together
Aggregate AND keep every row visible

The Fix

```
ROUND(gsr.gross_sales_mln*100/  
SUM(gsr.gross_sales_mln) OVER(),2)  
pct_of_total
```

Bonus Find

DAY 6 / 15

01/08/26

A trap that hides even after the fix

SUM(gsr.gross_sales_mln) OVER()

SUM() ON GROUPED ROWS

----- correct % share, once per row

SUM() Applied Twice on GROUPED ROWS

----- Always 100 % , nothing left to total

A Quick Analogy

Cricket Scoreboard

Team Total

300

Your Score

45

Contribution 15 %

Same Match , Different contribution

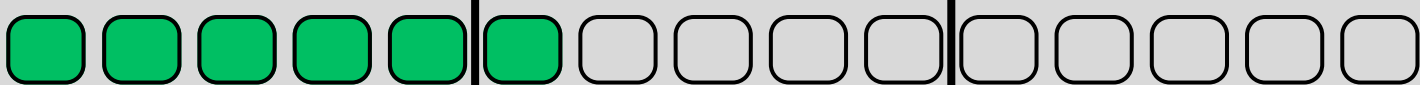

Likewise SUM() OVER () reads market's total

```
WITH gross_sales_report AS (SELECT
    fsm.fiscal_year,
    ROUND(SUM(fsm.sold_quantity * fgp.gross_price)/1000000,2)
    gross_sales_mln,
    dc.market,
    RANK() OVER (ORDER BY SUM(fsm.sold_quantity * fgp.gross_price)
DESC) rnk
FROM gdb0041.fact_sales_monthly fsm
JOIN dim_customer dc
    ON dc.customer_code = fsm.customer_code
JOIN fact_gross_price fgp
    ON fgp.product_code = fsm.product_code
    AND fgp.fiscal_year = fsm.fiscal_year
WHERE fsm.fiscal_year = 2021
GROUP BY dc.market),

grand_total_report AS (
    SELECT gsr.market , gsr.gross_sales_mln,
    ROUND(gsr.gross_sales_mln*100 /
    SUM(gsr.gross_sales_mln) OVER(),2) pct_of_total
FROM gross_sales_report gsr)

SELECT gtr.market,
gtr.gross_sales_mln,
gtr.pct_of_total
FROM grand_total_report gtr;
```
