

**I ordered by
MONTHNAME
GOT April
Before January**

ATLIQ HARDWARE GDB0041

MYSQL | Vishnu Ram Sachin | Data Analyst

Problem

Statement

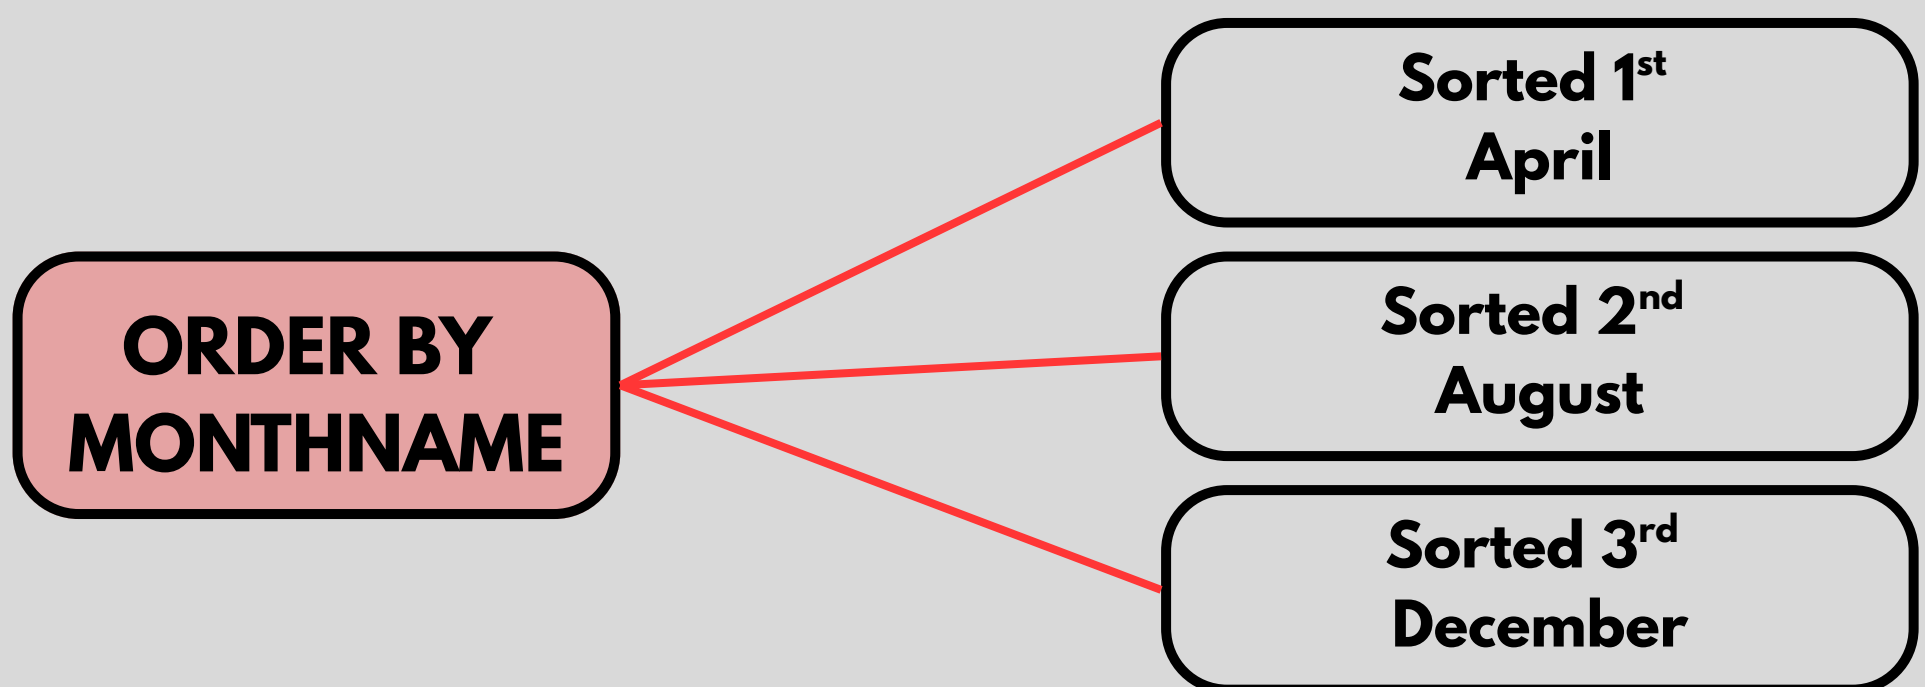

DAY 4 / 15

30/07/26

- Table: fact_sales_monthly (sold_quantity)
- Report Needed - Monthly Gross Sales - AtliQ E Store, India , FY 2021
- Your manager wants **oldest month first, each month once.**

The Trap ❌

- ORDER BY MONTHNAME(date) runs clean but sorts as **TEXT** , Not Calendar order

Requirment

DAY 4 / 15

30/07/26

YEAR(date)

MONTH(date)

Both columns together

The Fix

```
GROUP BY YEAR(fsm.date), MONTH(fsm.date),  
MONTHNAME(fsm.date)
```

```
ORDER BY YEAR(fsm.date), MONTH(fsm.date);
```

Bonus Find

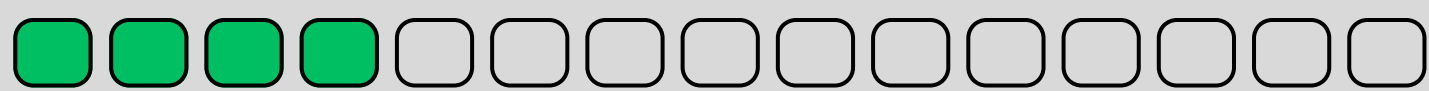

A trap that hides even after **ORDER BY**

WHERE dc.market = 'India'

AtliQ E Store is the same customer name across 24 different markets

WITHOUT market filter ----- 12 rows (24 markets blended)

WITH market filter ----- 9 rows (Only India , Correct)

A Quick Analogy

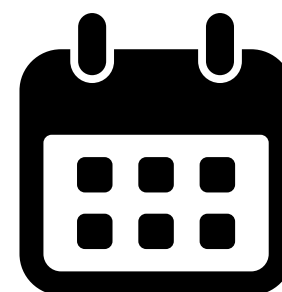

Sorting A Weekend List

Text Sort

Friday

Calendar Order

Monday

Different Order

Likewise, a month's name doesn't carry its place in the calendar - Only year + month do

Order $\neq$ Alphabet

SELECT

fsm.fiscal_year,

MONTHNAME(fsm.date) sales_month_name,

CONCAT(ROUND(SUM(fsm.sold_quantity * fgp.gross_price)
/1000000,2),' Mln') gross_sales_mln

FROM gdb0041.fact_sales_monthly fsm

JOIN dim_customer dc

ON dc.customer_code = fsm.customer_code

JOIN dim_product dp

ON dp.product_code = fsm.product_code

JOIN fact_gross_price fgp

ON fgp.product_code = fsm.product_code

AND fgp.fiscal_year = fsm.fiscal_year

WHERE

dc.customer = 'Atliq E store'

AND fsm.fiscal_year = 2021

AND dc.market = 'India'

GROUP BY YEAR(fsm.date), MONTH(fsm.date), MONTHNAME(fsm.date)

ORDER BY YEAR(fsm.date), MONTH(fsm.date);

DAY 4 / 15

30/07/26

The screenshot shows a SQL IDE interface with a query editor at the top and a results grid at the bottom. The query is a SELECT statement joining fact_sales_monthly, dim_customer, dim_product, and fact_gross_price tables. The results grid displays 9 rows of data with columns: fiscal_year, sales_month_name, and gross_sales_mln.

Query:

```

1 • SELECT
2     fsm.fiscal_year,
3     MONTHNAME(fsm.date) sales_month_name,
4     CONCAT(ROUND(SUM(fsm.sold_quantity * fgp.gross_price)/1000000,2),' Mln') gross_sales_mln
5 FROM gdb0041.fact_sales_monthly fsm
6 JOIN dim_customer dc
7     ON dc.customer_code = fsm.customer_code
8 JOIN dim_product dp
9     ON dp.product_code = fsm.product_code
10 JOIN fact_gross_price fgp
11     ON fgp.product_code = fsm.product_code

```

Results:

fiscal_year	sales_month_name	gross_sales_mln
2021	September	2.37 Mln
2021	October	3.03 Mln
2021	December	4.08 Mln
2021	January	2.31 Mln
2021	February	2.39 Mln
2021	April	2.26 Mln
2021	May	2.27 Mln
2021	June	2.23 Mln
2021	August	2.40 Mln

The bottom of the image shows the 'Output' pane with 'Action Output' selected, displaying a message: '1 17:53:17 SELECT fsm.fiscal_year, MONTHNAME(fsm.date) sales_month_name, CONCAT(ROUND(SUM(fsm.sold_quantity * ... 9 row(s) returned'.
